FLUID MILK MARKET REPORT FOR THE UNITED STATES

Rooms H-238-242
Building F
7 & B Sts., S.W.
Washington, D.C.

January 20, 1921.

MONTH OF JANUARY 1921

Producers' Prices for Standard Grade Milk - (Table I)

The following table presents a comparison of the net prices received by producers for fresh milk delivered f.o.b. local shipping points or milk plants operated by fluid milk dealers, or concerns whose chief business is the distribution of natural milk. These prices apply to milk testing 3.5% butterfat and differ from the f.o.b. city prices given in Table III by the costs of transportation applicable to different shipping points.

Sections	Range of Jan. Prices: Number Local Markets	Range of Jan. Prices: Prices per Hundredweight	Comparison of Prices for the Same Markets: Number Local Markets	1920 Average for Dec.	1921 Average for Jan.	1920 Average for Jan.
UNITED STATES	3035	$2.03-$5.23	2916	$3.50	$3.25	$3.82
New England	248	3.50- 4.85	248	4.27	3.89	4.20
Middle Atlantic	1234	2.65- 4.04	1189	3.31	3.30	3.77
E. North Central	551	2.10- 3.92	534	3.51	2.77	3.71
W. North Central	325	2.03- 3.86	304	3.33	2.93	3.59
South Atlantic	124	2.67- 5.23	122	4.15	4.05	4.19
E. South Central	129	2.23- 4.45	128	3.50	3.34	4.08
W. SouthCentral	83	2.76- 4.36	83	3.98	3.59	4.51
Mountain	112	2.27- 3.47	110	3.04	2.88	3.16
Pacific	229	2.32- 4.41	198	3.57	3.37	3.66

The states making up the geographic divisions are as follows:- New England - Maine, N.H., Vt., Mass., R.I., and Conn.; Middle Atlantic - N.Y., N.J., and Pa.; East North Central - Ohio, Ind., Ill., Mich., and Wis.; West North Central - Minn., Iowa, Mo., N.D., S.D., Nebraska and Kansas; South Atlantic - Del., Md., D.C., Va., W. Va., N.C., S.C., Ga., and Florida; East South Central - Ky., Tenn., Ala., and Miss. West South Central - Ark., La., Okla., and Texas; Mountain - Mont., Idaho, Wyo., Colo., N. Mex., Ariz., Utah and Nevada; Pacific - Washington, Oregon and California.

Prices for Special Grades of Milk and Certain Milk Products - (Table II)

The following table shows the wholesale and retail prices reported for "special" and "certified" milk and certain other dairy products delivered at wholesale buyers' places of business and at the homes of retail consumers. Wholesale prices are reported on the basis of bulk goods sold to and delivered at establishments of large scale consumers or users. Quotations for wholesale milk and light cream have been reduced to a gallon basis. For heavy cream, the wholesale price is quoted per pound of butterfat. For prices of "standard milk", see Table III of this report.

Cities	Special Milk: Retail Price per Quart	Certified Milk: Retail Price per Quart	Cultured Buttermilk: Wholesale Price perGal	Cultured Buttermilk: Retail Price per Qt	Cottage Cheese: Wholesale Price per Lb	Cottage Cheese: Retail Price per Lb	Light Cream 18-20% B.F.: Wholesale Price per Gallon	Light Cream 18-20% B.F.: Retail Price per 1/2 pt	Heavy Cream 28-40% B.F.: Wholesale Price per Lb. Butterfat

January [illegible] elling Prices of "Standard Grade Milk" - [illegible]

The following table presents the prevailing prices of "standard grade milk" in various markets of the United States. The prices given herewith are those paid or charged by the larger fluid milk marketing concerns of each city. If different dealers report different prices the highest and lowest prices are given in this table rather than an average of the different prices reported. In markets where there are active producers' marketing associations with whom dealers negotiate for a considerable portion of the city's milk supply, the association's selling price is indicated by an asterisk (*).

Unless the prices given in the first column of this table are followed by the letter "a" they apply to milk delivered to dealers at either city railroad terminals or at the dealer's distributing plant if deliveries are made direct from farms. When the price paid by dealers to producers applies to deliveries at country receiving stations and varies with different distance zones, the particular zone to which the given price applies is given in the footnote numbered to correspond to the number placed before the market in question.

The term "standard grade milk" is used to refer to that grade of milk which is most generally sold within the particular city for which prices are quoted. This grade of milk may be either raw or pasteurized but in case of most of the larger cities it is pasteurized. The "dealers' spread" or the difference between cost and selling prices for both wholesale and retail transactions can be ascertained if the butterfat test of milk as delivered to different classes of trade is known. The prevailing butterfat test varies with different cities. In many cities it ranges from 3.5 to 3.7%, whereas in some cities it seldom ranges below 4.0%.

To reduce prices per hundredweight to either a gallon or a quart basis divide by 11.63 or 46.53 respectively. See footnotes for basis of quotations and exceptions to given prices or special contractual provisions relating to the prices to be paid producers in different markets.

Markets for which Prices Are Given	Producers' Selling Prices per Cwt. of Raw Milk Delivered in Bulk:- (Flat Prices or Reduced to 3.5% B.F. Basis)	Dealer's F.O.B. City Cost per Cwt. of 3.5% Milk Collected through Country Stations (a)	Allowances or Prices per 1/10% Butterfat in a Hundredweight of Milk	Dealers' Selling Prices* To Wholesale Trade: Per Gallon (in lots of 5 to 20 Gallons) of Bulk Milk	To Wholesale Trade: Per Quart (in Cases of 12) Bottled Milk	To Family Trade: Per Single Quart of Bottled Milk	Retail Stores' Selling Prices per Single Quart of Bottled Milk *	Relation of Supply and Demand Conditions for January:- ** Estimated Surplus or Shortage	Increase or Decrease in % (+ or -) of December Sales over or under Nov. Sales ***

Explanations Regarding Prices and Other Data Given in Table III.

* Dealers' selling prices apply to milk delivered to homes of retail customers or to business establishments of wholesale customers. Retail store prices apply to systems of chain stores operated on the "cash and carry" basis and to independent groceries operating on a "credit and delivery" basis. In case "cash and Carry" stores sell at reduced prices, this class of stores selling prices are indicated by an asterisk (*).

** Estimated surpluses or shortages are based on the current receipts of milk from the regular patrons supplying the leading dealers, compared with their past month's sales and the prospective market demand conditions for the present month.

*** Comparisons of increases or decreases in monthly sales of market milk and the usual by-products handled by milk dealers are based on the sales records of same firms reporting for each month. It is important to note that the percentages given in the last column of this table are representative of sales conditions of only one or two of the larger dealers in each city and do not necessarily represent the actual condition for the market as a whole.

a This price applies to milk delivered at dealers' country receiving stations or at producers' railway shipping points. In the second column of this table there is given the f.o.b. city cost of bulk milk purchased on this basis including both transportation costs and country station operating expenses of one or more of the larger milk marketing concerns operating in this market. See footnote corresponding to number preceding the name of the city or market in order to ascertain the particular zone rate to which prices given in first column apply.

b The price given for this market in the first column of the table is applicable only to that portion of the dealers' supply that is resold in the form of fluid milk and cream or to such a portion of each individual producer's supply as comes within the limits of variation in production that is permitted by the terms of his contract with the dealers.

c In this market a producers' marketing agency, or association, arranges for the disposition of all surplus milk at whatever prices it is able to obtain, either by selling it to concerns which buy the milk for purposes of converting it into manufactured dairy products or by manufacturing the surplus in factories operated by the association or agency itself.

d In this market the price of milk is based on some accepted wholesale market quotation for butter or for American cheese. In case no prices are given it is because they are dependent upon the average of the quotations for the current month.

g Fat in excess of 4% is paid for on the basis of current prices paid by creameries for cream used in making butter or on the basis of some accepted wholesale butter market quotations. In San Diego a premium of 14 cents over the San Francisco market is paid per pound of "excess fat".

h In this market the price to be paid to each producer is determined by multiplying the price allowed per pound of butterfat by the average number of pounds of butterfat contained in the milk delivered and adding an extra allowance for the non-fat content of whole milk. In those markets where the allowance per pound butterfat is agreed upon in advance, the amount of such an allowance per point or 1/10 pound butterfat (in a hundredweight of milk) is given in the third column of the table.

1. For the San Diego method of determining milk prices see page 5 of the February 1920 report.

2. For basis of producers' prices and surplus plan in the New Haven, Waterbury and Hartford markets, see note 3 page 5 of the April 1920 report.

In New Haven one dealer's country stations are located in the 21-30 mile zone of the New York regional market and the New York Dairymen's League prices apply to milk purchased there. In the Hartford market the Dairymen's League prices apply to milk delivered at country stations located in the 61-70 mile zone of the New York regional market.

3. The "country station price" given for the Bridgeport market applies to shipments of milk originating in the 81-90 mile zone for the New York regional market.

4. For detailed description of method of determining prices for the Evansville, Indiana, market, see page 6 of the February 1920 report. For later modification of this method see note 4 page 5 of the March report.

5. The producers' association agreement with dealers in the Baltimore market provides that a basic quantity of milk be determined for each producer by his average production during the months of September, October, November and December 1920. All production in excess of this basic quantity is surplus and is paid for at a lower price, which for the month of January, is 4¢ less per gallon than the basic price.

6. The "country station price" given for the Boston market applies to the 201-220 mile freight zone. The price schedule for milk delivered during January is based on $4.42 per hundredweight f.o.b. Boston. When milk is bought by weight and test the dealer will make allowances for variation in butterfat test on the basis of the average monthly quotations of the Boston Chamber of Commerce for creamery extra butter per pound. This price per pound or per point shall be added to each 0.1 of 1% above 3.7% and deducted for each 0.1 of 1% below 3.7% for each hundredweight of milk. Following are the allowances made for such variation: April-5.75¢; May-5.0¢; June-5.7¢; July-5.7¢; August-5.6-1/8¢; September-5.85¢; October-5.81¢; November-5.86¢; December-5.37¢. The association further accepts the loss arising from sur-

plus production by their members according to terms, conditions and agreed changes of the surplus plan previously adopted by the Federal Milk Commission for New England, with the provision that the producers agree to accept the surplus loss to the amount of 1/2¢ per quart. Losses in excess of 1/2¢ per quart will be borne by the dealer. The cost of administering the surplus plan is to be shared equally by producer and dealer.

7. The method of determining prices for the Minneapolis and St. Paul markets (described in note e page 5 of the January 1920 report) has been modified as follows: The price of 100 pounds of 3.5% milk will be determined by averaging ten times the average of the Plymouth, Wisconsin quotations for cheese (styles "Twins", "Daisies" and "Young Americas") for the preceding month, with 5.2 times the average of the New York quotations for 92 score butter for the preceding month: plus an arbitrary differential which will vary as follows: August 85¢, September 90¢, October 95¢, November 90¢, December 80¢, January 1921 70¢, February 65¢, March 60¢, April 55¢, May 50¢, June 40¢, July 60¢. For the fat in milk above or below 3.5%, 5¢ per 1/10% will be added or deducted.

8. For detailed description of method of determining prices for the St. Louis market, see note 10 page 6 of the December 1920 report.

9. $3.38 applies to shipments of milk received in Newark originating in the 201-210 mile zone for the New York regional market.

10. Two distinct "country station" price schedules apply to the Trenton market. $3.53 is the Dairymen's League price applying to shipments of milk originating in the 71-80 mile zone for the New York market. $2.88 applies to shipments originating in the 51-60 mile zone of the Philadelphia market.

11. The "country station price" for Buffalo is the price applying to shipments of milk originating in the 390-400 mile zone from New York City.

12. For basis of producers' prices in the New York market see note 14 page 6 of the May 1920 report. The "country station price" given for New York City applies to the 200-210 mile zone.

13. The "country station" price for the Rochester market is the price applying to shipments of milk originating in the 370-380 mile freight zone from New York City.

14. In the Cleveland market a basic quantity of milk is determined for each producer, by his average production during the months of September, October and November 1920. All production in excess of this basic quantity is surplus and is paid for at a lower price. For January deliveries this price will be $2.32 per hundredweight delivered f.o.b. city and $2.00 at country stations regardless of test.

15. In the Columbus market the price paid for milk is based on the Chicago butter quotations for "Extras". The January price will be determined as follows: For deliveries f.o.b. city add $1.10 per hundredweight to 6¢ above the current month's average Chicago 92 score butter quotations for each pound of fat contained in 100 pounds of milk; for deliveries at "country receiving stations" add 50¢ per hundredweight to 6¢ above this average quotation.

16. For basis of producers' prices in the Philadelphia market see "Philadelphia Milk Price Agreement" on page 6 of the April 1920 report. The "country station" price for the Philadelphia market applies to the 51-60 mile freight zone.

17. The "country station" price given for the Wilkes-Barre market applies to shipments of milk originating in the 201-210 mile freight zone for the New York regional market.

18. See footnote 21, page 6 of the May 1920 report for basis of producers' prices and surplus plan for the Nashville market.

February Cost and Selling Prices of "Standard Grade Milk" - (Table 111)

The term "standard grade milk" is used to refer to that grade of milk which is most generally sold within the particular city for which prices are quoted. This grade of milk may be either raw or pasteurized, but in case of most of the larger cities it is pasteurized. Producers' prices are F.O.B. City.

Note: * Prices marked thus represent prices agreed upon by dealers and an active producer's marketing association.

Markets for which prices are given	Producers' Selling Prices Per cwt. raw milk delivered (Flat prices or 3.5% butterfat basis)	Allowance per 1/10% butterfat per cwt.	Dealers' Selling Prices Wholesale Trade Per Gal. in lots of 5-20 Gal. in bulk	Per Qt. Bottled (Cases of 12)	Per Qt. to family Trade Bottled	Retail Store Prices per Qt. Bottled	Estimate Supply and Demand Conditions for February

March Milk Prices Decline

Surplus production reported in most markets. in March

The average decline in prices paid producers for milk for city distribution was 28¢ per cwt. below the February price. The decrease was largest in the East South Central section amounting to about 82¢ per cwt.

Retail prices came down with the wholesale and averaged about 1¢ per quart. The sales by dealers showed a trifle increase over the previous month. In most markets there was reported a large surplus production due principally to mild weather and favorable conditions.

Retail prices per quart in ten of the larger consuming cities for February and March were as follows:

City	February	March	City	February	March
Boston	16½	15¾	New York	16	15
Philadelphia	13	12-13	Pittsburg	15	14
Chicago	13-14	14	Detroit	12-13	12-13
St. Louis	15	14	New Orleans	17	16
Kansas City	13-15	13-14	San Francisco	15-16	15

Milk Prices Contine Decline

Increased surplus production reported in most markets. Reductions in price to producers for April milk in several markets varied from a few cents to over a dollar per cwt. below the March price.

Retail prices were also reduced in many markets, the reduction varying from ½ to 3¢ per quart. Conditions slightly improved were reported by a few dealers. Large surplusages continue to affect the markets.

(Table 11) May Cost and Selling Prices

Cost Prices are for standard grade milk of 3.5% quality. Delivered city prices include country station and transportation charges when such are incurred. In the cities marked thus (*) the price given does not apply to surplus milk.

Selling Prices are for that quality of milk commonly sold in the city for which prices are given.

Milk Price Declines Continue During May

Considerably reduced prices were paid for fluid milk in the majority of markets during the month of May. Reductions range from 10 to 87 cents per cwt. Seasonal increased production together with cool weather and curtailed consumption in several markets have increased the amount of surplus and been influential factors in price reductions.

The pooling plan of the Dairymen's League became effective this month although all details of it have not been completed.

TABLE III MAY COST PRICES OF "STANDARD GRADE MILK" 3.5% B.F. FOR CITIES WHERE PART OF THE SUPPLY IS PURCHASED THROUGH COUNTRY STATIONS

	Prices Paid Producers Per Cwt. Raw Milk (Flat prices of 3.5% B.F. basis.)		Freight Zones to which Country Station Prices Apply
	F.O.B. City	At Country Stations	
Bridgeport, Conn.	3.95		81-90 mile zone, New York City

The states making up the geographic divisions are as follows:- New England - Maine, N.H., Vt., Mass., R.I. and Conn.; Middle Atlantic - N.Y., N.J., and Pa.; E.North Central - Ohio, Ind., Ill., Mich., and Wis.; W.North Central - Minn., Iowa, Mo., N.Dak., S.Dak., Nebr., and Kansas; South Atlantic - Del., Md., D.C., Va., W.Va., N.C., S.C., Ga., and Fla.; E.South Central - Ky., Tenn., Ala., and Miss.; W.South Central - Ark., La., Okla., and Texas; Mountain - Mont., Wyo., Colo., N.Mex., Idaho,; Ariz., Utah, and Nev.; Pacific - Wash., Oreg., and Calif.

Table II - June Cost and Selling Prices

Cost Prices are for standard grade milk of 3.5% quality. Delivered city prices include country station and transportation charges when such are incurred. In the cities marked thus (*) the price given does not apply to surplus milk.

Selling Prices are for that quality of milk commonly sold in the city for which prices are given.

Markets for which prices are given	Dealers' Cost Prices per cwt. Raw milk Delivered (Flat prices or 3.5% Butterfat basis)	Allowance per 1/10% Butterfat per cwt.	Dealers' Selling Prices: Wholesale Trade: Per Gal. in Lots of 5-20 gal. in bulk	Dealers' Selling Prices: Wholesale Trade: Per Qt. Bottled (Cases of 12)	Dealers' Selling Prices: Retail Trade: Per Qt. Bottled to family trade	Dealers' Selling Prices: Retail Trade: Store Prices Per Qt. Bottled	Prevailing Butterfat Test of Milk Sold

JUNE FLUID MILK MARKET UNSETTLED

Prices for fluid milk to producers and consumers were further reduced for the month of June. An abnormally large supply in excess of dealers regular demands saleable at by-product prices has been a disturbing factor in many milk markets. As the fresh production decreases, producers look for more stable conditions.
